

New Zealand: Emissions Trading Scheme

Make it Count

Monitor, verify and report carbon in agriculture and forestry. Our staff has been doing it for over 10 years.

Build knowledge and confidence of landowners so they can make informed decisions in this new market.

Specialise in knowing the accounting rules, conforming to guidelines and standards and delivering results that our clients can trust.

Ensuring land owners have cost effective access to carbon markets.

The Project:

The experienced team in Wanaka has worked closely with farmers and landowners of more than 15 000 hectares to register their forest in the Emission Trading Scheme (ETS) or under the Permanent Forest Sink Initiative (PFSI).

These programs give New Zealand landowners access to the growing carbon market and provides a range of opportunities to diversify farm income through the creation of carbon credits, known as New Zealand Units (NZUs). These units can be sold on both national and international markets.

What We Do:

Environmental Accounting Services (EAS) provide the following services:

- Cost Benefit Analysis
- Carbon Project Registration
- Mapping of forest areas to the required standards
- Field plot measurement to existing protocols
- Annual returns to the Ministry of Agriculture and Forestry
- Registration of credits
- Work with stakeholders to address land tenure issues
